GooDee

Attention

This is a Public Revision version. Some information is concealed due to NDA.

A large, faint watermark of the GooDee logo is centered at the bottom of the page. The logo consists of the word "GooDee" in a stylized, rounded font, with a blue-to-white gradient. The letters are partially obscured by a circular pattern of small dots.

GooDee

1 Overview

GooDee is wholesale NFT discounter. It allows users to:

- buy NFT as a bundle at a discounted market floor price
- sell their NFT for GDY (Gov Token) at a premium market floor price

Market is oversaturated with NFTs, 99% of them don't have any usage except PFP. Most of NFTs have lost their value and are just collecting dust in people wallets. Platform gives these people a way to capitalize on their NFTs by providing a GooDee Token (GDY /goodē/) in return for their assets. GDY has premium price so it's economically more beneficial for user to swap NFT on GooDee platform than selling it on marketplace.

What benefits does the platform give to creator of the NFT collection?

NFTs are locked inside GooDee ecosystem pressuring the floor price and increasing authority of the collection.

What benefits does the platform give to NFT owner?

User exchanges his NFT for a GDY with a premium price. Premium price is dynamic price ranging in 1%-10% above NFT floor price, expressed in GDYs. GDY has an utility inside the GooDee ecosystem.

GooDee

2 Phase 0. ICO

Initial Coin Offering with NFTs.

2.1 Overview

ICO will allow GDY to obtain an initial value and to bootstrap LP. GooDee ICO is different from traditional ICO as it requires user to stake NFT instead of cryptocoins. The procedure of the ICO is following:

- user stakes their NFT(s) on GooDee website
- user receives GDY in amount proportional to total NFTs staked
- user claims GDYs
- user can unstake his NFT(s) afterwards

We are aiming to attract at least 100 NFT collections for the ICO phase. Which totals to about 1,000,000 NFT tokens, from which we expect about 10% of users to lock their NFTs in ICO, or about 100,000 NFTs. We issue 1,000,000 GDYs for ICO to make nominal value of GDY be equal 1/10 of an average NFT value.

Only NFTs from an approved collections will be eligible for GDY claim. GDY claimable amount may vary depending on the collection value.

GDY distribution tiers:

- Tier 1: All staked NFTs will receive token amount proportional to NFT value
- Tier 2: Donated NFTs (locked forever) will receive boosted amount as first wave helpers
- Tier 3: GooDee NFT collection tokens
- Tier 4: Rarest tokens from GooDee NFT collection will receive maximum amount of GDY tokens.

2.2 GooDee NFT collection

GooDee

3 Phase 1. GooDee

General overview of the system.

3.1 GDY

GDY is an ERC20 governance token for the GooDee platform. It allows users to:

- vote to approve new collection on the platform
- lock the token to receive portion of platform's revenue
- stake the lock to change internal price of the NFT

GDY is not tradable until Phase 1 is launched to eliminate premature market volatility.
